

ASAD ULLAH

Full-Stack Developer

Berlin, Germany | +49 152 1707 7447 | asadullah88801@gmail.com | [GitHub](#) | [LinkedIn](#)

Work Authorization

Status: Student Visa

Permit: Allowed to work full days (120/year) or half days (240/year)

Availability: 20 hours per week, flexible during the semester

Languages

English: C1/C2 (fluent)

German: A1/A2 (currently learning)

Skills

Languages

JavaScript, C++, SQL, ES6+

Frontend

React.js, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend & DB

Node.js, Express.js, REST APIs, MySQL, MongoDB

Tools & Methods

Git/GitHub, VS Code, OOP, SDLC, Algorithms

Professional Summary

Full-Stack Software Engineer and Founder of Zista Systems, a software house delivering web, mobile, and AI solutions. Builds fast, reliable products from raising a site's performance score from 72 to 94 to lifting mobile engagement by 32% , across 8+ months of hands-on experience in three engineering roles. Now building toward an MSc in Berlin. Looking for a Werkstudent or part-time IT role to bring that same drive to a new team.

Work Experience

Software Engineer

Nov 2024 – Mar 2025

Firnas.tech • Remote

- Built 50+ reusable web components with React.js, JavaScript, HTML5, and Bootstrap to reduce repeated code across the project.
- Worked with design and product teams to deliver 15+ new features on time, using a more structured debugging process to find issues faster.
- Raised the site's performance score from 72 to 94 by compressing files and loading images only when needed

Software Engineer

Sep 2024 – Oct 2024

Sparking Asia • Remote

- Built reusable page layouts in React.js with strong test coverage and accessibility support.
- Designed pages that work well on 8+ different screen sizes, **increasing mobile use by 32%**.
- Ran 200+ tests to find and fix 25+ bugs before launch.

Software Engineering Intern

May 2024 – Aug 2024

Code Alpha • Virtual Internship

- Built 3 full web applications from initial concept through to deployment.
- Built backend APIs with Node.js, Express.js, and MySQL to support core app features.
- Set up shared data handling in React.js so the app updates instantly, **boosting user engagement by 42%**.

Projects

Deep Learning Cancer Detection Hub

2024

Final Year Project • University of Management and Technology

- Co-developed a lung and colon cancer detection system using transfer learning across three CNN architectures — **VGG16, VGG19, and DenseNet121** — trained on the 25,000-image LC25000 histopathology dataset (5 tissue classes).
- VGG16 achieved the best result at **99.24% test accuracy**, with DenseNet121 (99.04%) and VGG19 (98.92%) close behind; evaluated with accuracy, precision, recall, F1-score, and confusion matrix analysis.
- [HayaQuest](#) — MDCAT/IMAT exam-prep platform with MCQ practice, built with the MERN stack.
- [Damaska Perfumes](#) — E-commerce storefront for a perfume brand, built with the MERN stack.
- [DubaiChauffeurs](#) — Car rental booking platform for Dubai, built with the MERN stack.

Education

Bachelor of Science (B.Sc.) in Software Engineering

Oct 2020 – Sep 2024

University of Management and Technology (UMT), Lahore

Relevant Coursework: Object-Oriented Programming, Advanced Database Systems, Data Structures & Algorithms, Machine Learning

Certifications

[Meta: HTML & CSS in Depth](#)

[Google: Foundations of User Experience \(UX\) Design](#)

[IBM: Introduction to Software Engineering](#)

[University of London: Introduction to Object-Oriented Programming in C++](#)
